

IN THE SPECIFICATION

Please insert the following heading before the first full paragraph on page 1 as follows:

a¹ BACKGROUND OF THE INVENTION

1. Field of the Invention.

Please insert the following heading between the first and second paragraphs between lines 3-4 on page 1 as follows:

a² 1. Description of the Related Art.

Please insert the following heading before the first paragraph on page 2 as follows:

a³ SUMMARY OF THE INVENTION

Please insert the following heading between the fifth and sixth paragraphs between lines 14-15 on page 6 as follows:

a⁴ BRIEF DESCRIPTION OF THE DRAWINGS

Please insert the following heading between the third and fourth paragraphs between lines 6-7 on page 7 as follows.

a5
DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENTS

Please amend the second paragraph on page 12 as follows.

a6
Figure 5 illustrates a second embodiment. In this, the support 4 is again moulded onto seat 14, which here has a flat shape. The seat carries the component 12 by means of a layer of thermally conductive glue 30. The dissipator 26 here has an essentially flat shape. It is fixed to the support 4, parallel to it. The dissipator 26 has a protuberance 32 extending with clearance in the opening 22 and having a flat end face coming into surface contact with the face of the seat 14 opposite to the component 12, which is directed towards the machine. The machine has fixing screws 34 each passing through an orifice in the dissipator 26, an orifice in the support 4 and an orifice in a bearing 36 of the machine housing. Thus the same screws 34 provide the fixing of the dissipator 26 to the support 4 and the fixing of the support 4 to the machine 3.
